

# PCI Compliance Challenges

PCI Compliance looks different for every organization, and underestimating that complexity can be not only risky, but expensive. Organizations need to understand which 3rd parties can impact compliance, every channel across which sensitive cardholder data (CHO) flows, every system in which it is stored, who is handling or sharing that sensitive data, and how it is being used. In fact, many organizations still fall short of compliance in the end, having left PCI data undiscovered in one system or another.

Trusting PCI experts to guide you can reduce the amount of time, money, and risk involved in becoming compliant. As a Qualified Security Assessor (QSA) CISO Global Digital Security offers complete PCI services to support your organization from beginning to end.

**Achieving PCI compliance** can be confusing.

As a QSA, **CISO** will determine and explain **exactly** how the PCI DSS applies to **your specific** organization.

CISO Global can assist with every phase of compliance:

- Penetration Testing – Penetration testing is an all-encompassing security evaluation, which measures how well an organization's security controls stand up to malicious threats both internal and external to your environment.  
CISO Global's Red Team, a group of experienced ethical hackers, will simulate a real attack, with the goal of helping your organization proactively uncover and address weaknesses before they are compromised by attackers.
- ASV Scanning – CISO supplies an official ASV Scanning Report each quarter, providing evidence that your scans were completed in compliance with PCI. Managed Scanning is also available for organizations that wish to perform additional scanning upon request with raw technical scan results provided.
- PCI Gap Assessment – A review of all pertinent PCI DSS requirements and applicable security program elements to identify gaps in processes, actions, or states, presented as a formal PCI Gap Analysis report.
- PCI Audit – Our assessment will validate your organization's adherence to the 12 PCI DSS requirements and provide you with an official Report on Compliance (ROC), detailing your compliance status with the PCI DSS.

## About Us

A leader in cybersecurity and compliance services, CISO Global brings together expert practitioners and thought leaders to provide tailored solutions that drive cyber resilience. The company's top-tier talent spans geographies, specialties, industries, regulatory frameworks, and focus areas and includes auditors, compliance specialists, certified forensics experts, ethical hackers, security engineers, and around-the-clock analysts.

### RISK & COMPLIANCE

- Gap Analysis
- Audit & Assessment
- Third-Party Risk Management
- FedRAMP & StateRAMP
- Compliance Support
- Risk Advisory Services
- Virtual CISO
- Managed GRC
- TiGRIS
- 25+ Security Frameworks Supported

### SECURITY OPERATIONS & IR

- Extended Detection & Response
- Managed Detection & Response
- Security Information & Event Management
- SOC as a Service
- Vulnerability Management Program
- Attack Surface Reduction
- Incident Response
- Digital Forensics
- Threat Intelligence

### SECURITY TESTING & CERTIFICATION TRAINING

- Penetration Testing
- Tabletop Exercises
- Training Programs
- Security Testing Methodology
- CMMC & Other Certifications
- Security Awareness Training
- Red Team
- Purple Team
- Cloud, Network, Application, & Physical Pen Tests

### SECURITY ARCHITECTURE & ENGINEERING

- Cloud Security
- Data Protection
- Remediation
- Secure Network Architecture
- Identity & Access Management
- Secured Managed Services
- Advanced Firewall Management

SOC 2® Type II Audited
