We Fix It Right The First Time, Every Time

What Is Remediation?

After a penetration test or vulnerability assessment, many organizations are left holding the bag on the list of projects that need to be completed to harden their environment due to a lack of internal time and resources needed to complete them. This leaves your organization vulnerable to attackers.

Why most people can't remediate:

- Time & resources stretched thin
- Lack of highly specialized expertise
- Focused on other priority projects

The result can be report after report with the same issues, and frustration from your security leadership due to a lack of improvement.

Cybersecurity incidents and ransomware attacks can also leave your organization in need of immediate remediation support. Our full IR remediation team is available to help.

Why Choose CISO Global?

CISO maintains a deep bench of highly specialized experts who are trained, certified, and highly experienced with engineering solutions to remediate nearly any issue you may be facing. We will align the right experts to your needs, working with your team to speed up your projects and move the security needle. Extensive remediation experience.

Key Program Outcomes: Eliminate flaws and defects, **end** the cycle of outdated patches, and **move the security needle faster.**

The CISO Approach To Remediation

| Verify Flaws or Defects | Create Remediation Plan | Implement Repairs | Monitor Results |

CISO GLOBAL

About Us

A leader in cybersecurity and compliance services, CISO Global brings together expert practitioners and thought leaders to provide tailored solutions that drive cyber resilience. The company's top-tier talent spans geographies, specialties, industries, regulatory frameworks, and focus areas and includes auditors, compliance specialists, certified forensics experts, ethical hackers, security engineers, and around-the-clock analysts.
