# CISO As A Service (CISOₐₐS)

Speed Up Your Team's Path to Cyber Resilience with Expert Support

Full-time CISOs are Hard to Hire and Retain

With the ongoing cyber workforce shortage hitting near crisis levels, lack of mature leadership is leading many security programs to stall out, relying on ineffective strategies and lacking ROI.

Key Program Outcomes

- Proven Security Action Plan
- Trusted Security Leadership Partner
- Implementation of Security Initiatives

> **3.5 million unfilled cybersecurity jobs due to lack of trained workforce**
>
> Source - Cybersecurity Ventures

Why Choose Cerberus Sentinel?

Our accessible approach is perfect for every level of your program's maturity. We have decades of experience building successful information security programs across diverse organization sizes, industries, and business models. We know how to prioritize initiatives to deliver maximum impact in the minimum timeframe.

- CISOs have a minimum of 20 years of experience
- Industry specific knowledge and expertise
- Custom fit engagements tailored to your needs
- Hands-on involvement included in every engagement

What Can Cerberus Sentinel CISOs Do For You?

Assessments: To understand your security needs, a pre-assessment is conducted to identify the maturity of your security program and identify the most probable risks your organization faces.

Strategies: Based on the assessment, our CISOs work with you to develop a strategy that makes the most sense for your organization by balancing security investments against threats to the business.

What Can Cerberus Sentinel CISOs Do For You?

Advisory & Oversight: Having Information Security Officers available on-demand means you have a trusted partner to review your security strategy, design your budget allocation model, manage your vendor relationships, and deliver valuable status reports to your board of directors.

Engagement: Beyond strategy, our CISOs have the resources at their disposal to ensure that information security initiatives are implemented quickly and correctly by pulling from the vast technical expertise of the larger Cerberus Sentinel team.
