

Strategic Investigation, Response, & Recovery

Security Operations Center

Responding to a security incident requires experts who know how to identify and mitigate an immediate threat, investigate underlying vulnerabilities that led to the threat, address any regulatory compliance implications, and restore order right away. With its own, fully-staffed, 24x7x365 Security Operations Center, CISO Global has the highly trained Security Analysts, Incident Response Consultants, advanced tool sets, security clearance levels, and years of expertise to provide a fully coordinated Incident Response team to restore order during what can feel like a chaotic event for any organization.

Secure Your Environment from Current Threat

Our experts will immediately assess your environment, contain the incident, prevent further damage, and deploy short-term, 24x7x365 monitoring tools to ensure no further malicious activity occurs.

Once your systems are secured, **CISO experts** will help you strategize for ways to **restore your environment to working order** as efficiently as possible, as well as **protect** yourself from an attack going forward.

Restore and Rebuild

CISO IT Teams will be available to work as an extension of your existing team to help restore and rebuild any affected systems needing additional remediation.

- Investigate, Contain, & Recover
