

What Is Certification Training?

Preparing for a certification assessment is a challenging task. Our certification training courses prepare you for taking – and passing – the most important cybersecurity certificate assessments. They include detailed reviews of the knowledge requirements, in-depth Q&A sessions, and sample questions from actual exams.

Why Choose CISO Global?

Our trainers are highly skilled industry veterans with decades of experience working in the cybersecurity and IT fields. They hold the most important cybersecurity-related certifications, including those from (ISC)2 and CompTIA. They have taught in-person and online, delivering cybersecurity training to corporate, military, government, and higher education students.

Our Certification Training program stands out because of our approach:

- Our trainers bring with them decades of cybersecurity expertise combating every type of cyber threat as well as years of training others to do the same.
- You will learn how to perfect your understanding of the concepts as well as how to take and pass the exam on your first attempt.
- Course content is engaging, challenging, constantly updated, and relevant to current certification requirements.

Training For The Most **Valuable** Certifications

CISO Global Prepares You for These Certifications

CompTIA Linux+
Certification Boot
Camp (5 days)

This course covers common tasks in major distributions of Linux, including the Linux command line, basic maintenance, installing and configuring workstations, and networking in preparation for the CompTIA Linux+ Certification.

CompTIA Network+
Certification Boot
Camp (5 days)

This course is intended for entry-level computer support professionals with a basic knowledge of computer hardware, software, and operating systems who wish to increase their knowledge and understanding of networking concepts and acquire the required skills to prepare for a career in network support or administration with the CompTIA Network+ certification.

CompTIA Security+
Certification Boot
Camp (5 days)

This course is targeted toward the IT professional who has networking and administrative skills in Windows®-based Transmission Control Protocol/Internet Protocol (TCP/IP) networks and familiarity with other operating systems, such as Mac OS X®, Unix, or Linux. Ideal for those who wish to further their career in IT by acquiring foundational knowledge of security topics, prepare for the CompTIA Security+ certification examination, or use Security+ as the foundation for advanced security certifications or career roles.

CompTIA CySA+
Certification Boot
Camp (5 days)

Cyber threats are increasing at an alarming rate every year and organizations' ability to defend themselves against full-scale distributed attacks quickly and effectively is becoming more and more difficult. This course is taught by leaders in network defense who work in the computer security industry, this course demonstrates how to defend large scale network infrastructure by building and maintaining intrusion-detection systems, network security auditing, and incident response techniques. You will learn how to isolate and prioritize threats in real-time. This course aids in preparation for the CompTIA Cybersecurity Analyst (CySA+) certification.

CompTIA PenTest+ Certification Boot Camp (5 days)

This course examines offensive hacking techniques as a step-in understanding Network Defense. This process is explored using a Penetration Testing framework and uses current hacking tools and techniques. During the course, simple but effective countermeasures are offered as steps in improving the Network Defense of the target. This course aids in preparation for the CompTIA PenTest+ certification.

(ISC)2 CISSP Certification Boot Camp (5 days)

The vendor-neutral Certified Information Systems Security Professional (CISSP) certification is the ideal credential for those with proven deep technical and managerial competence, skills, experience, and credibility to design, engineer, implement, and manage their organization's overall information security program to protect against sophisticated attacks. This course aids in preparation for the CISSP examination.

(ISC)2 CAP Certification Boot Camp (5 days)

The vendor-neutral Certified Authorization Professional (CAP) certification course is ideal for IT, information security and information assurance practitioners who work in Governance, Risk and Compliance (GRC) roles and need to understand, apply, and/or implement a risk management program for IT systems within an organization. This course aids in preparation for the CAP examination.
