

Endpoints Are More Vulnerable Than Ever Before

With the amount of remote workers in today's business environment, your endpoints are as vulnerable as ever to the risk of cyber attacks. To protect your systems, you need to stop attacks at the endpoint level before they can spread to your entire network. That means updating your endpoint protection strategies to include technology capable of handling such a high-risk threat landscape.

How MDR Protects You

MDR unifies prevention, detection, and response in a seamless service technology offering powered by certified analysts, machine learning, and automation.

Combining these capabilities with our around-the-clock, certified and highly trained security personnel for alert validation and remediation, MDR is a comprehensive threat management solution for your endpoints.

What's Included with MDR Services

- Prevention and detection of attacks across all major vectors
- Rapid elimination of threats
- Fully automated, policy-driven response capabilities
- Complete visibility into the endpoint environment
- Full-context, real-time forensics

"Your **Team** came highly **recommended** to us, and we appreciate the **peace of mind** we have knowing they are **monitoring** our endpoints **24x7**."

-Quek Song, Vice President of IT
