Security Monitoring For Your Network

It takes a sophisticated network defender to detect and stop today's advanced threats. We are your trusted partner for industry-leading managed security services. SIEM (Security Information and Event Management) service aggregates and correlates logs from across your network and monitors network traffic so that our security experts can quickly stop threats.

You can sleep well at night knowing that our 24x7x365, SOC 2 Type II Certified, Security Operations Center (SOC) is watching your network around-the-clock. Our SOC is fully-staffed with trained and certified professionals that become an extension of your team. You are only alerted when action needs to be taken. Our SOC analysts take all the guesswork out of the response process by walking you through remediation.

CISO Global **experienced security professionals** will work with you to design a **customized, comprehensive monitoring** and **response strategy**.

Businesses of all sizes rely on SIEM for:

- 24x7x365 monitoring and alerting
- Security event logging, retention & monitoring to meet compliance obligations
- Asset discovery to detect rogue and unmanaged devices
- Periodic reporting and customized dashboards
- Access to the largest open threat intelligence community
- Service personalization to meet your unique goals

Benefits of Working with CISO Global

Uncover potential, address real, network security threats. Continuous monitoring will identify evidence of suspicious internal & external network activity, and insecure network configuration settings.

Meet Compliance Needs. SIEM Services record security events and associated data for analysis, addressing your audit documentation needs

Leave it to the Experts. Additional human analysis & validation by certified security professionals makes CISO's solution superior to exclusively automated intrusion detection products.
