

Trusted Partner Network (TPN) Assessment

Protecting intellectual property (IP) ranks as one of the greatest modern struggles for film makers. Most producers rely heavily on countless 3rd party providers to assist in the creation and refinement process. Such providers include talent agents, screenplay writers and cinematographers

This need for a standard to protect IP has brought about the creation of the Trusted Partner Network (TPN). Developed through the efforts of the Motion Picture Association of America (MPAA) and the Content Delivery and Security Association (CDSA), the joint venture offers individual 3rd-party vendors a way to validate their

CISO is a highly experienced and **credentialed IT-Security firm**, with **Qualified TPN Assessors** who will evaluate your IT environment to validate your company's security posture against TPN standards, recommending steps to help you to **remediate any identified gaps**.

working remotely, or independent animators who are developing particular scenes within a feature film. With so many providers who are creating, storing, sending, and receiving sensitive files, it can be hard to establish consistent information security practices from vendor to vendor.

ability to protect proprietary content they have been hired to deliver, and maintain privacy in all communications about high-profile figures or projects.
