

# Managing Vulnerabilities Effectively Takes More Than Just Scanning

Conducting routine vulnerability scans is simple. Remediating all of those vulnerabilities is where most organizations struggle. Timely patching and remediation is vital to your security. All too often, critical and high-risk vulnerabilities do not get the necessary attention between scans. CISO Global can help you enhance security within your organization through our MVP program, supporting the entire Vulnerability Management Life Cycle—from vulnerability discovery through remediation verification.

Leverage the **MVP portal** for risk-based remediation by **filtering recurring false-positives** and **gain expert guidance** then assign & manage remediation tasks.

MVP, Vulnerability Program Management Services, are designed for organizations serious about understanding and addressing network vulnerabilities. Our consultative approach will help you overcome the common pitfalls of vulnerability management. We deliver structured, cadence driven, vulnerability management services, utilizing advanced scanning toolsets, risk-based analysis, our powerful Vulnerability Management Portal, and our expertise to support you each step of the way.

- **Leverage The MVP Portal:** Scanning results from multiple tools, remediation, and audit documentation can be managed from one interface.
- **Risk-Based Remediation:** Vulnerability ratings, assigned asset value, and criticality rankings help you see which issues to address first.
- **Filter Recurring False-Positives:** Designate false-positives for more accurate future results, and centralize remediation evidence for auditors.
- **Gain Expert Guidance:** CISO experts can walk you through even complex remediation tasks step-by-step.
- **Assign & Manage Remediation Tasks:** The MVP portal helps you easily see and keep track of your team's progress.

## About Us

A leader in cybersecurity and compliance services, CISO Global brings together expert practitioners and thought leaders to provide tailored solutions that drive cyber resilience. The company's top-tier talent spans geographies, specialties, industries, regulatory frameworks, and focus areas and includes auditors, compliance specialists, certified forensics experts, ethical hackers, security engineers, and around-the-clock analysts.

**STRATEGY & RISK**

- Gap Analysis
- Audit/Assessment
- Third Party Risk Management
- FedRAMP
- StateRAMP
- CMMC
- Advisory
- Virtual CISO
- Managed Compliance
- Managed GRC

**CYBER DEFENSE OPERATIONS**

- Extended Detection & Response
- Managed Detection & Response
- SIEM as a Service
- Threat Hunting
- Cyber Threat Intelligence
- Digital Forensics
- Vulnerability Management Program
- Attack Surface Reduction
- Cyber Incident Response

**SECURITY ARCHITECTURE & ENGINEERING SOLUTIONS**

- Secured Managed Services
- Advanced Firewall Management
- Identity & Access Management
- Cloud Security
- Data Protection
- Remediation

**READINESS & RESILIENCY**

- Penetration Testing
- Tabletop Exercises with Incident Response Retainer
- Training Programs
