

# Make sure your digital assets are as secure and reliable as you are.

Your local customers trust you to protect what's precious and to be there for them – even in hard times. Make sure your digital assets are as secure and reliable as you are.

**Rising **cyber-attacks** threaten your ability to provide financial services and **conduct business** as usual, impacting **operational resilience**.**

## Cybersecurity Tabletop Exercises for Financial Institutions

How will you ACTUALLY handle a real cyber-attack? Other disaster? Find out how prepared you really are – not just on paper, in the real world.

Our experts will work with your team in a simulated attack or disaster, identifying gaps in response plans and helping you improve resiliency – so you're READY, no matter what.

- Surpass old school tabletop exercises with realistic emergencies and cybersecurity experts
- Find and fix hidden gaps in your breach & disaster recovery plans
- Improve your readiness for a real-world attack
- Avoid mistakes that will cause even robust response plans to fail in your time of need
- Validate your legal, media, PR strategy's viability in the event of an attack or other outage
- Get a prioritized list of next steps to tighten your response plans
- Protect your reputation with customers through preparedness for cyber-attacks
- Gain peace of mind.

## Penetration Testing for Networks, Apps, and More

Wonder how secure your bank's network REALLY is? What about gaps and vulnerabilities? How quickly could a hacker get into your systems? After our tests, you won't wonder about your institution's security score. You'll know.

- Simulate real world, threat-informed cyber-attacks to test your security controls
- Realign your security controls to human & network changes over time
- Prioritized list of your most critical vulnerabilities & attack vectors
- Simulate a real-world attack with expert hackers
- Validate that your cybersecurity does more than just meet compliance
- Learn exactly what your IT team needs to do to secure your financial institution
- Uncover and address weaknesses before attackers do
- Simulate — and making sure you can thwart — real-world attack processes.
- Find and fix your most critical vulnerabilities to avoid being a “sitting duck”
- Meet compliance requirements with TRADITIONAL, RED TEAM, or PURPLE TEAM tests

# Secured Managed Services with Compliance & Breach Response Support

You need everything – servers, laptops, software, cloud deployments, FINTECHs, firewalls, backups, printers, online portals, and more – working together. All the time. From day one.

- Networks designed to be resilient, secure, & scalable
- Fast-tracked cybersecurity and compliance goals.
- Fully managed patch and vulnerability management program
- Unlimited support for and inventory of your network & devices
- Get help communicating with your other providers, like FINTECHs
- Endpoint protection from malware & ransomware 24/7 with managed detection and response (MDR)

**Our Zero Dollar Breach Response Retainer gets business processes out of the way, so we can deploy right away when every second counts – 24/7, on-call support**

- Strong password management and multi-factor authentication (MFA)
- Security awareness with custom, simulated phishing “attacks”
- Fully encrypt your endpoints and easily manage their keys in ONE place.
- Get secure backups & firewall, fully managed from day one.
- Save valuable time in emergencies with a built-in, zero-dollar Breach Response Retainer
- On-site support during compliance audits & examinations

**STRATEGY & RISK**

- Gap Analysis
- Audit/Assessment
- Third Party Risk Management
- Advisory
- Virtual CISO
- Managed Compliance

**CYBER DEFENSE OPERATIONS**

- Extended Detection and Response / Managed Detection and Response
- SIEM as a Service
- Threat Hunting
- Cyber Threat Intelligence
- Digital Forensics
- Vulnerability Management Program
- Attack Surface Reduction

**SECURITY ARCHITECTURE & ENGINEERING SOLUTIONS**

- Advanced Firewall Management
- Identity and Access Management
- Secured Managed Services
- Cloud Security
- Data Protection
- Remediation

**READINESS & RESILIENCY**

- Penetration Testing
- Tabletop Exercises and Wargames
- Training Programs
