CHECKLIGHT®

AI + Financial Protection = Cybersecurity AND Financial Peace of Mind

CHECKLIGHT® is a powerful and proactive security monitoring software that detects potential threats to your endpoints and alerts you so you can react before attacks take hold, reducing the impact in the event of a breach. Relying on the same cybersecurity software engine used by several federal agencies, it identifies malicious software, such as fraudulent phishing attacks, hacking, imposter scams, malware, ransomware, and viruses.

CHECKLIGHT® is backed by a **$1,500,000 warranty**

What Is the Problem?

- **92%** of IT professionals say **cyber crime is increasing**.

- Ransomware attacks are expected to claim a **new business victim every 11 seconds**.

- **43%** of breach victims are **small businesses**.

- The current average cost of a **ransomware attack is over $5 million**.

What Makes CHECKLIGHT® So Powerful?

- Your endpoints are **constantly scanned**. Malicious software is **identified and quarantined** as it appears.

- CHECKLIGHT® actively **monitors your system**, studies the new viruses it encounters, and **develops unique defenses** to protect you.

- The intuitive platform can be installed and **up and running** on your endpoints in **10 minutes**.

- Since its creation, CHECKLIGHT® has **never allowed a breach to go undetected**.

CHECKLIGHT® Features

- **Next generation signature, behavior, and machine learning (ML) algorithms** continuously monitor registered endpoints, providing near real-time threat detection

- Driven by **former US government security officials** with over **50 combined years** of experience in cybersecurity

- Specializes in **kill chain methodology** for **added protection** against zero-day viruses

- Recognizes **known/unknown malware; malware-less attacks** (WMI, PowerShell, VBA) and **real-time and dwell-time attacks**

- Works with **Windows/MacOS/LINUX** systems

- Requires **minimal system resources** (approx. 35MB and 1% CPU use)

- All processing done on **cloud-native architecture** (AWS)

- Endpoint protection that **works across all operating systems** and hardware on your network

- **Seamlessly operates** with all existing software/hardware solution sets

- **Instantaneously alerts user** of attacks/threats via email, text, and dashboard notices

- Provides **comprehensive dashboard for visibility** of endpoint health, update status, and overall security state

- Generates **user-defined periodic summary reports** to support compliance and audit requirements

- Offers **consultative access** to team of **IT security engineers** who can address security breaches

About Us

CISO Global (NASDAQCM: CISO), based in Scottsdale, Arizona, is a Top #25 managed cybersecurity and compliance services provider and industry leader in proprietary software that is delivering innovative solutions through its newly developed AI and ML-powered product portfolio. The company protects the most demanding businesses and government organizations against continuing and emerging security threats and ensures their compliance obligations are being met.
